AI agent stop conditions

Handover: CVE-2026-123158, run 10 Nov 2026 09:12 to 09:21

[ ] Reason for stop: 3 failed post-change checks (limit 3) on host alp-stg-01
[ ] Tried: apk upgrade of openssh-server to 9.9_p2-r1 at 09:18; checked package version and sshd process start time at 09:19, 09:20, 09:21
[ ] Saw: package version is fixed; sshd started 08:02, before the upgrade; the running daemon is still the old code
[ ] Changed: 1 package upgrade on alp-stg-01. Nothing else. 22 hosts untouched
[ ] Not changed: no restart (no restart tool in scope), no config edits
[ ] Needs a person: restart sshd on alp-stg-01, confirm the check passes, then say whether the restart may become a tool
[ ] Paged: on-call, security operations, 09:21
[ ] Transcript: run id and link
